*"Hi, I'm Fawn!"*  
 I am a darling 5-year-old girl with an independent side. I love giving and receiving attention and pets on my own terms. I also enjoy exploring a room, looking out the windows, and playing with a laser toy. I need a forever family that will take the time to get to know me. I can be sassy, quirky, playful, and affectionate. However, I prefer no other felines in the home. If you are looking for a social, bright-eyed, independent kitty, I'm your girl!"

For more information on how to adopt Fawn, visit [www.CedarBendHumane.org](http://www.CedarBendHumane.org) or call 319-232-6887.

Your business, organization, or group can be the reason shelter pets find homes! For details, contact Tom at 319-232-4500 or [tom@cvsaver.com](mailto:tom@cvsaver.com).

# WHEELS & DEALS

## 4 signs it's time to replace your tires

Inflation has been a hot topic for several years, as the cost of everything from groceries to gas to housing has increased considerably since 2019. Cars are no exception to that phenomenon, and anyone who has purchased a new car over the last half decade likely experienced some sticker shock when they started their search for a new vehicle. Data from Kelley Blue Book indicates the average cost of a new car was \$37,590 in 2019. By 2023, the average cost had risen to \$47,899. That marks an increase of more than 27

percent in a four-year period. Cars are indeed a significant investment, which underscores the importance of vehicle maintenance. Maintenance is more than just tending to what's under the hood. Tires also require drivers' attention, as aging, damaged tires pose a safety risk that also compromise vehicle performance. Tires are easily overlooked, but the following are four signs tires need to be replaced.

1. Worn tread: The automotive experts at AutoZone® note that tread depth is the most prevalent

indicator that a tire needs to be replaced. AutoZone® notes that tread depth should always be at least 2/32 of an inch throughout the tire. Depth should be measured across the tread and around the circumference. If the tread is at or below 2/32 of an inch, the tire should be replaced.

2. Bulges, gouges or cracks: Geico® notes that a deflated tire bulges at the sides, and that can compromise the safety of everyone in the vehicle. AutoZone® says bulges occur when air gets between the inner liner and outer rubber layers, which can happen after hitting a curb or driving over a sizable pothole. A gouge or cut that is deeper than the outer layer of the tire also necessitates replacement.

3. Poor grip: Drivers may be able to feel certain tire problems, including poor grip, while driving. In such instances, tires may feel as though they are slipping. The tire experts at Firestone note

that low tread can reduce tire traction and cause wheels to slip, which may be more noticeable when accelerating from a stop or driving on wet roads. Drivers who feel their tires are slipping can test the tread and replace tires that

are low.

4. Vibration: Vibration is another issue drivers may feel rather than see. And identifying the cause requires noting where the vibrations are felt. Geico® notes that a feeling of vibration or thumping that

feels like it's coming from under the seats may indicate the tires are not balanced. A suspension issue could be to blame if the steering wheel feels like it's vibrating. Either feeling should be brought to the attention of a mechanic immediately.

Tire issues affect vehicle performance and compromise the safety of drivers, their passengers and fellow motorists. When vehicles are not performing at peak capacity, drivers should not overlook various tire issues as a potential cause of such troubles.

## Why regular car washes are important

Taking care of a vehicle involves more than just maintaining the equipment under the hood. There are a number of steps involved in keeping a car or truck in top form, and that includes regular car washes.

Car washes keep a vehicle shiny and clean, which can help it look

good while sitting in the driveway or cruising the highway. However, regular car washes are more than cosmetic.

- Protection from the sun: A car that is routinely and properly washed and waxed is less vulnerable to damage from the sun's ultraviolet rays.

- Extend the life of paint: Dirt and debris can build up on the paint surface and eventually lead to scratches and other damage. Bird droppings and sap can be corrosive. Washing will help remove grime and protect the paint in the process.

- Preserve the vehicle's value: Drivers who plan

to sell or trade in their vehicles in the future should realize that a well-maintained car can bring in as much as 20 percent more for above-average condition, according to Kelley Blue Book. Maintaining a clean and shiny vehicle can protect its long-term value.

- Remove salt: Drivers who live near the ocean or in areas where roads are salted in the winter to melt snow may have cars with high salt corrosion rates. Unless it's washed off frequently, salt can take its toll, leading to damage.

- Improve fuel efficiency: Drivers have felt pain in their wallets at the fuel

pump in recent years. Dirty cars may be less aerodynamic and less fuel-efficient as a result. Keeping a car clean may improve its fuel efficiency.

- Maintain the interior: Car washes are not only about the exterior. Keeping a clean and tidy interior can help improve the air quality inside of the vehicle and prolong the life of upholstery, mats and interior components.

Car washes should be a routine part of vehicle maintenance. Professional car washes tend to be more eco-friendly than washing a car at home, so drivers are urged investigate their service plans and features.
